GROUP_18

PROJECT MARKS

Following are the results of your final project marking.

The project was tested in Android Studio with the following setup:

Android studio version: Ladybug feature drop 2024.2.2

Compile SDK: 35

Min SDK: 24

Target SDK: 35

Java Version: 11

Gradle plugin version: 8.8

Gradle version: 8.10.2

After cloning a fresh copy of your repository, features were tested in order that they appear in the "Done" column on your group's Trello board. Testing terminated when a feature that failed to pass the "happy path" was encountered.

Each feature was marked as follows:

zero (0)--Missing, or not graded due to earlier failures.

5 pts--Not really: present, but fails happy path.

6.5 pts--Somewhat: fails boundary values or devious input.

8 pts--Mostly: no failures, but not ready for Play Store.

9.5 pts--Definitely: no failures, could be published as-is on Play Store.

Extra features were considered only if all other features achieved "Mostly." Additionally, extra features only result in extra credit if they are marked "Mostly."

This is my favorite app so far. Thanks for injecting some levity into the grading process :)

Section/+ Component	Mark	Score		Possible
Marks				
+ Feature 1:	**Somewhat**	6.5	of	10
Welcome activity.				
Shouldn't it save my terms of use response after the first time?				
+ Feature 2:	**Mostly**	8	of	10
Theme for pages.　　　　Might be a stretch for a feature, but works and is consistent.				

+	Feature 3:	**Mostly**	8	of	10

Meme fragment UI.

+	Feature 4:	**Mostly**	8	of	10

Joke fragment UI.

+	Feature 5:	**Mostly**	8	of	10

Meme API integration.

+	Feature 6:	**Mostly**	8	of	10

Joke API integration.

+	Feature 7:	**Missing**	0	of	10

Preloading.

I couldn't find evidence of this: disconnecting from the Internet just results in errors loading jokes or memes. Missing.

+	Feature 8:	**Mostly**	8	of	10

Scroll to continue view.

Is this "swipe down?"

+	Feature 9:	**Mostly**	8	of	10

Backwards scroll navigation.   Is this swipe up?

+	Feature 10:	**Not really**	5	of	10

Share.

This is hard to test, especially without email sharing:

• I tried sharing via message, but it requires there to be contacts.

• I tried sharing via maps, which failed.

• I tried sharing via "quick share" but that requires bluetooth which doesn't seem to be integrated into the emulator.

It would have been useful to provide instructions for testing this feature on your Trello board.

+	Feature 11:	**Mostly**	8	of	10

Settings.

+	Feature 12:	**Not really**	5	of	10

Notification service.

What does this do? I enabled it, but could not see any effect.

Marks gross score:		80.5	of	120

Adjustments to Marks

-	Extra Credit:	+ 0 =	80.5	of	120

Extra features.

Not evaluated due to failures noted above.

Marks net score:	80.5	of	120

Total net score:	80.5	of	120 = 67%
